SUMMARY

Web scraping and data extraction specialist with over a decade building crawlers, browser-automation pipelines, and the anti-bot evasion that keeps them running at scale. That spans enterprise search-engine crawlers, large-scale marketplace data mining, and high-volume carrier-portal integration, getting clean data past defenses like Cloudflare, Akamai, and DataDome. Runs 70+ public scrapers on [Apify](#), including SERP scrapers for Google News, Bing, DuckDuckGo, Google Maps, and YouTube. Maintains open-source anti-detection tools such as [httpmorph](#), [ChromiumFish](#), and [Chromixer](#).

CORE SKILLS

- **Scraping & Automation:** Playwright, Puppeteer, Selenium, Scrapy, Nodriver, Camoufox, Proxyman, custom browser-extension based scraping, plus self-built anti-fingerprint library, extension & stealth scraping browser
- **Languages:** Python, JavaScript/TypeScript, Ruby on Rails, Java, C/C++
- **Data & Storage:** PostgreSQL, MySQL, SQLite, MongoDB, BigQuery, Neo4j
- **Observability:** Datadog, Sentry, PagerDuty, Rollbar, Better Stack, Metabase reporting

EXPERIENCE

Senior Integration Engineer · [Terminal49](#)

Jan 2023 – May 2026

Remote · Scraping infrastructure for shipping & logistics data

- Own the scraping pipeline for 50+ ocean carriers on Ruby on Rails, at millions of requests a day.
- Built custom scraping infrastructure from the ground up.
- Beat bot defenses from Cloudflare, Akamai, and DataDome across carrier and port portals.
- Automate multi-step logins, MFA, and long sessions in Playwright.
- Engineered the anti-detection stack: fingerprint spoofing, residential proxies, CAPTCHA, and TLS/JA3 shaping.
- Built Terminal49 Chat, an agentic interface to ask about shipments in plain English.

Chief Technology Officer · [HelloTask](#)

May 2022 – Dec 2022

Dhaka, Bangladesh

- Led engineering for a blue-collar job-matching platform: architecture, data pipelines, and backend APIs.

Deputy General Manager, IT · [Shakti Foundation](#)

Jan 2021 – May 2022

Dhaka, Bangladesh

- Delivered the Shakti ERP and SME mobile apps end-to-end on Java/Kotlin and .NET/SQL Server.

Software Engineer / Team Lead · [Riseup Labs](#)

Sep 2019 – Dec 2020

Dhaka, Bangladesh

- Tech lead on data-heavy products for UNICEF, FAO/UN, and government clients.
- Built scraping and data-mining pipelines into MySQL, Firebase, and BigQuery.
- Shipped Android apps, Django/Laravel backends, and Vue frontends.

Software Developer · [AppconSoft](#)

Nov 2014 – Apr 2017

Dhaka, Bangladesh · Search engines, crawlers, test automation

- Built the web-crawler layer for Akor, an Apache Solr search engine indexing millions of pages.
- Wrote custom crawlers and Selenium automation in C/C++, PHP, and Java, with anti-SPAM filtering.
- Developed a custom web server and scraping tools for client-specific extraction.

- Built the AppsDrone: scraped Google Play at scale and decompiled APKs to analyze Smali/Dalvik bytecode.
- Wrote crawlers and data-mining jobs in C/C++, PHP, and Python, generating marketplace trend reports.

PERSONAL PROJECTS

ChromiumFish · github.com/arman-bd/chromiumfish ☆ 140+

Stealth Chromium with a drop-in Playwright harness (Python & Node), plus WebRTC evasion and agentic capabilities.

httpmorph · github.com/arman-bd/httpmorph ☆ 150+

Drop-in Python `requests` replacement with a custom C / BoringSSL stack for browser-grade TLS, JA3 & JA4 fingerprints.

Chromixer · github.com/arman-bd/chromixer ☆ 35+

Chrome extension delivering comprehensive browser fingerprint protection against modern tracking techniques.

GuppyLM · github.com/arman-bd/guppylm ☆ 3400+

A ~9M parameter LLM that talks like a small fish.
